

CELANEX® 3309HR | PBT | Glass Reinforced

Description

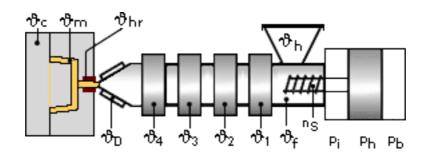

Celanex 3309HR is a non-lubricated, 30% fiberglass reinforced Polybutylene Terephthalate which has excellent hydrolysis resistance, mechanical properties and processability.

Density	Physical properties	Value	Unit	Test Standard
Mold shrinkage - normal	Density	1540	kg/m³	ISO 1183
Mold shrinkage - normal	Mold shrinkage - parallel	0.3-0.5	%	ISO 294-4
Humidity absorption (23°C/50%RH)		0.7-0.9	%	ISO 294-4
Tensile modulus (1mm/min) 9200 MPa ISO 527-2/1A		0.16	%	ISO 62
Tensile stress at break (5mm/min) 139 MPa ISO 527-2/1A Tensile strain at break (5mm/min) 2.7 % ISO 527-2/1A Flexural nodulus (23°C) 8700 MPa ISO 178 Flexural strength (23°C) 210 MPa ISO 178 Charpy impact strength @ 23°C 46 kJ/m² ISO 179/1eU Charpy impact strength @ -30°C 45 kJ/m² ISO 179/1eU Charpy notched impact strength @ -30°C 8.5 kJ/m² ISO 179/1eA Charpy notched impact strength @ -30°C 8.5 kJ/m² ISO 179/1eA Unnotched impact strength (Izod) @ 23°C 35 kJ/m² ISO 180/1U Notched impact strength (Izod) @ 23°C 12.0 kJ/m² ISO 180/1A Thermal properties Value Unit Test Standard Melting temperature (10°C/min) 225 °C ISO 11357-1,-2,-3 Glass transition temperature (10°C/min) 225 °C ISO 155-1/-2 DTUL @ 1.8 MPa 225 °C ISO 75-1/-2 Vical softening temp	Mechanical properties	Value	Unit	Test Standard

CELANEX® 3309HR | PBT | Glass Reinforced

Typical injection moulding processing conditions

Pre Drying:

Necessary low maximum residual moisture content: 0.02%

To avoid hydrolytic degradation during processing, CELANEX resins have to be dried to a moisture level equal to or less than 0.02%. Drying should be done in a dehumidifying hopper dryer capable of dewpoints <-40°F (-40°C) at 250°F (121°C) for 4 hours.

For subsequent storage of the material in the dryer until processed (<= 60 h) it is necessary to lower the temperature to 100° C.

Drying time: 4 h

Drying temperature: 120 - 130 °C

Temperature:

·	[∜] Manifold	[®] Mold	[®] Melt	[∜] Nozzle	[∜] Zone4	^უ Zone3	[₺] Zone2	¹⁹ Zone1	[∜] Feed	[ூ] Hopper

		psı		
Screw Speed Injection Speed	Medium Fast			
TILLECTION Speed	rast			

Injection speed, injection pressure and holding pressure have to be optimized to the individual article geometry. To avoid material degradation during processing low back pressure and minimum screw speed have to be used. Overheating of the material has to be avoided, in particular for flame retardant grades. Up to 25% clean and dry regrind may be used.

General Disclaimer

This publication was printed based on Celanese's present state of knowledge, and Celanese undertakes no obligation to update it. Because conditions of product use are outside Celanese's control, Celanese makes no warranties, express or implied, and assumes no liability in connection with any use of this information. Nothing herein is intended as a license to operate under or a recommendation to infringe any patents.

NOTICE TO USERS: Values shown are based on testing of laboratory test specimens and represent data that fall within the standard range of properties for natural material. These values alone do not represent a sufficient basis for any part design and are not intended for use in establishing maximum, minimum, or ranges of values for specification purposes. Colorants or other additives may cause significant variations in data values.

Properties of molded parts can be influenced by a wide variety of factors including, but not limited to, material selection, additives, part design, processing conditions and environmental exposure. Any determination of the suitability of a particular material and part design for any use contemplated by the users and the manner of such use is the sole responsibility of the users, who must assure themselves that the material as subsequently processed meets the needs of their particular product or use.

To the best of our knowledge, the information contained in this publication is accurate; however, we do not assume any liability whatsoever for the accuracy and completeness of such information. The information contained in this publication should not be construed as a promise or guarantee of specific properties of our products. It is the sole responsibility of the users to investigate whether any existing patents are infringed by the use of the materials mentioned in this publication.

Moreover, there is a need to reduce human exposure to many materials to the lowest practical limits in view of possible adverse effects. To the extent that any hazards may have been mentioned in this publication, we neither suggest nor guarantee that such hazards are the only ones that exist. We recommend that persons intending to rely on any recommendation or to use any equipment, processing technique or material mentioned in this publication should satisfy themselves that they can meet all applicable safety and health standards. We strongly recommend that users seek and adhere to the manufacturer's current instructions for handling each material they use, and entrust the handling of such material to adequately trained personnel only. Please call the telephone numbers listed (+49 (0) 69 30516299 for Europe, +1 859-372-3244 for the Americas and +86 21 3861 9266 for Asia) for additional technical information. Visit our web site for the appropriate Safety Data Sheets (SDS) before attempting to process our products. Feel free to call Customer Services for additional assistance
